# Building End-to-End Multi-Client Service Oriented Applications

Module 11

The Car Rental Web Site

*Part 2 – Web API & Single-Page-Applications*

**pluralsight**

hardcore developer training

# Highlights

- **The Web API**
  - Base controller
  - Attribute routing
  - Pattern for writing operations (actions)
  - Embracement of HTTP
  - Error handling
- **Single-Page-Applications**
  - One delivered view (from MVC)
  - Several sub-views (HTML sections)
  - All client-side flipping
  - Many techniques for doing SPAs
  - Offers the richest user experience (think Gmail)
